

QUALITY CONNECTS US

Company Overview

Aeromotive Services Inc specializes in the design, prototype, manufacture, and remanufacture of wire harnesses and wire assemblies. Founded in 1996, Aeromotive has over 25 years of experience in providing high-quality electrical products and services to its customers. Aeromotive is committed to delivering unyielding customer service and innovative solutions to meet the electrical needs of its clients.

Capabilities

- **Wire Harness Remanufacturing & Reconditioning:** Aeromotive can restore wire harness to its original condition, replacing any and all damaged components and rebuilding back to “like new” condition.
- **Custom Manufacturing of Wire Assemblies:** Aeromotive can design and manufacture custom wire assemblies for any application, from simple to complex. Aeromotive can work with any specifications, materials, connectors, and terminations to create wire assemblies that meet the highest standards of quality and performance.

Differentiators

- **Quality:** Aeromotive is an AS9100 certified manufacturer that follows strict quality control procedures and adheres to industry best practices.
- **Innovation:** Aeromotive is constantly developing new solutions to meet the changing needs of the market.
- **Experience:** Aeromotive has over 25 years of experience in the electrical industry and has served clients from various sectors, including commercial equipment. Aeromotive has a team of skilled and knowledgeable technicians who can handle any electrical challenge.
